ACTIVATION CONCEPTS · NOVEMBER 2026 · SAMPLE WITH A FICTIONAL BRAND

Northfield Outdoor Co. at a three-day music festival

Three ways to put 30,000 festival-goers in Northfield gear for the first cold night.

June 2027 · 40 × 30 ft footprint near the main stage · Budget $150–250K

THE BRIEF

Make Northfield the brand people thank when the desert gets cold.

Audience

30,000 a day, mostly 22–38, camping on site, outdoorsy but not gear experts.

Place

Outdoor, 40 × 30 ft, open 11 am to 2 am, generator power, wind over 20 mph most evenings.

Success looks like

45,000 interactions, 8,000 email sign-ups, and the jacket in festival photos.

Assumptions: three-day load-in, union crew not required, sampling of product allowed.

CONCEPT B · STRETCH · GUEST JOURNEY

The Warming Hut: a lantern-lit cabin that opens when the temperature drops.

1. **Arrive.** A glowing A-frame cabin, a live thermometer on the roof.
2. **Enter.** Below 60°F the doors open; inside is warm, quiet and wood-lined.
3. **Try on.** Grab a Northfield fleece from the wall and wear it for the night.
4. **Share.** The window seat frames the main stage lights behind you.
5. **Leave with.** Return the fleece for a patch, or buy it at 30% off.

Why it fits Northfield

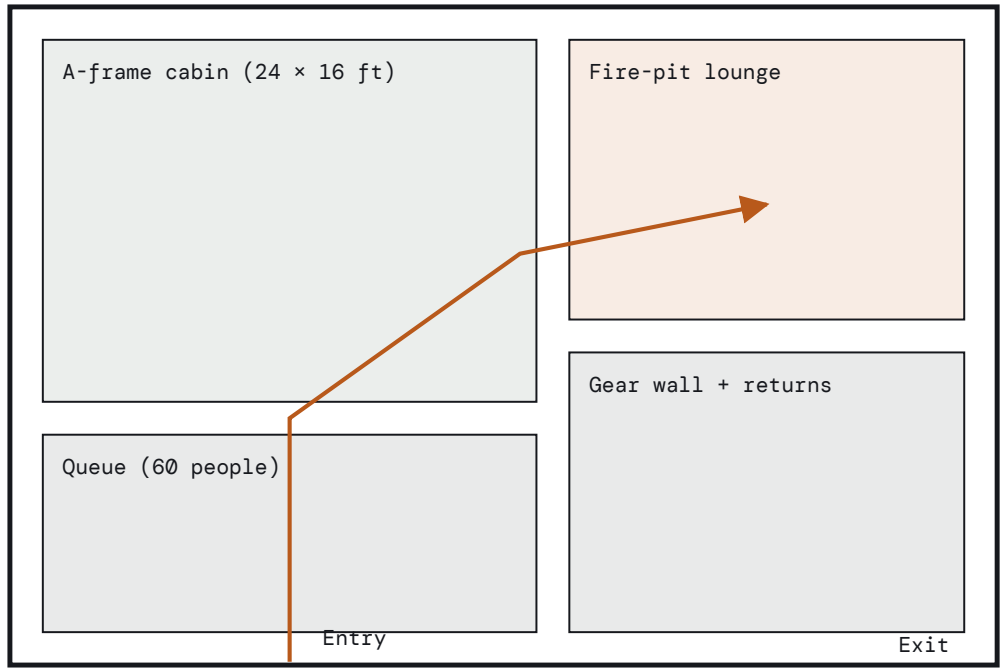

Their "Stay Out Longer" campaign is about the hours after dark. This is that, live.

Throughput

720 guests/hour (60 inside × 5 min dwell)

CONCEPT B · PLAN AND BUILD

40 × 30 ft: an A-frame cabin, a fire-pit lounge and a gear wall.

1 square = 1 ft. Main stage to the north.

Structure	Prefab A-frame panels on a 6 in deck, ballasted for 40 mph wind
Finishes	Cedar-look wall panels, wool throws, brand-color lanterns
Tech	Roof thermometer display, warm-white LED, 2 heaters (radiant)
Power	≈ 6.8 kW, one 20 kW generator shared with lounge
Staff	2 hosts, 2 gear wall, 1 lead per shift
Load-in	3 days, crew of 6

CONCEPT B · BUDGET AND RISKS

$175–215K ESTIMATE

CATEGORY	RANGE
Design and production management	$28–34K
Fabrication and materials	$62–76K
Tech, lighting and heat	$18–22K
Staffing (3 days)	$21–25K
Product for wear-and-return	$24–30K
Logistics, permits, insurance, contingency	$22–28K

Risks and fixes

- Wind over 30 mph: ballast to engineer's spec, close doors.
- Fleeces not returned: deposit by card tap, $40 hold.
- Heaters near fabric: radiant only, 3 ft clearance, fire marshal sign-off.

Measured by

- Interactions: door counter
- Sign-ups: tap-to-borrow
- Photos: tagged posts
