Patagonia at Outside Lands

Three ways to keep 75,000 people a day warm in the fog, without selling them anything new.

August 2027 · Golden Gate Park, San Francisco · Budget $150–250K · Figures from public sources, November 2026

THE BRIEF

Show what "We're in business to save our home planet" looks like at a sold-out festival.

Audience

225,000 over three days in 2026, about 75,000 a day, sold out. The city asks them to come by bike, Muni or on foot.

Wikipedia; Ingleside Light; ABC7

Place

Eco Lands, the festival's environmental area since 2008, with a solar-powered stage and charging stations. Evenings in the park get cold and foggy.

Eco Lands: Wikipedia

Success looks like

Jackets repaired instead of replaced, clothing kept out of landfill, and Worn Wear trade-ins started on site.

Builds on what both already do: Patagonia's Worn Wear team tours with a mobile repair trailer, and Outside Lands runs textile recycling with SF Environment. Photo: Polo Field, by Hlutz, CC BY-SA 4.0

CONCEPT B · STRETCH · GUEST JOURNEY

The Worn Wear Fog Camp: bring the jacket you came in, and leave with it fixed.

1. **Arrive.** A repair trailer and a warm, lantern-lit tent in Eco Lands, with a fog-level sign: "Too cold? Come in."
2. **Drop off.** Hand over a torn jacket, broken zip or lost button. Any brand.
3. **Warm up.** Wait in a heated lounge, with the main stage on a screen.
4. **Pick up.** A text when it's ready, plus a patch stitched on if you want one.
5. **Leave with.** Your own jacket, fixed. Worn-out pieces go to the festival's textile recycling.

Why it fits Patagonia

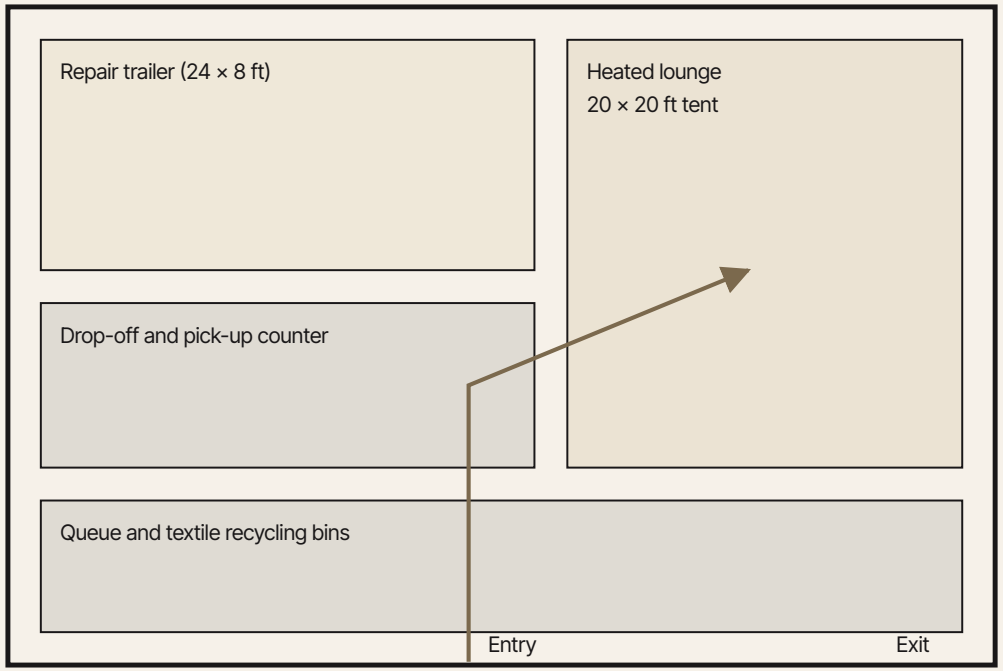

Repair over replace is the Worn Wear program, and the festival already has the recycling to finish the loop.

Throughput ESTIMATE

About 720 repairs (6 stations × 4 an hour × 10 hours × 3 days)

CONCEPT B · PLAN AND BUILD

40 × 30 ft: a repair trailer, a heated lounge and a drop-off counter.

Not to scale. Eco Lands placement to confirm with the festival.

Structure	Worn Wear repair trailer, 20 × 20 ft frame tent with sidewalls, ballasted for wind
Finishes	Reclaimed-wood counter, wool blankets, warm lanterns
Tech	6 sewing stations, text-when-ready queue, stage feed screen
Power ESTIMATE	≈ 4 kW: 2 radiant heaters, 6 machines, lighting; from festival power
Staff	6 repair techs, 2 hosts, 1 lead per shift
Load-in	2 days, crew of 4

CONCEPT B · BUDGET AND RISKS

$128–164K ESTIMATE

CATEGORY	RANGE
Design and production management	$24–30K
Tent, trailer setup and finishes	$38–48K
Repair team travel and staffing (3 days)	$30–38K
Power, lighting and heat	$10–14K
Repair materials and patches	$6–8K
Logistics, permits, insurance, contingency	$20–26K

Risks and fixes

- Queue too long: cap drop-offs per hour and text people back.
- Lost items: tagged tickets and photo at drop-off.
- Heaters near fabric: radiant only, 3 ft clearance, fire marshal sign-off.

Measured by

- Repairs: drop-off tickets
- Landfill avoided: textile bins weighed
- Trade-ins: Worn Wear sign-ups
